'The first edition of Graham Priest's Introduction to Non-
Classical Logic turned out to be an extremely useful and well-
written introductory guide to the vast and difficult to survey
area of non-classical and philosophical logic. The
substantially expanded second edition in two volumes is
bound to become a standard reference.'

An Introduction to Non-Classical Logic: Amazon.co.uk ...
This book is an introduction to non-classical propositional logics. It brings together for the first time in a textbook a range of topics in logic, many of them of relatively recent origin, including modal, conditional, intuitionist, many-valued, paraconsistent, relevant and fuzzy logics.

An Introduction to Non-Classical Logic: Amazon.co.uk ...
This revised and considerably expanded 2nd edition brings together a wide range of topics, including modal, tense, conditional, intuitionist, many-valued, paraconsistent, relevant, and fuzzy logics. Part 1, on propositional logic, is the old Introduction, but contains much new material. Part 2 is entirely new, and covers quantification and identity for all the logics in Part 1.
