[Seventh grade Lesson Area of Composite Shapes | BetterLesson](#)

A composite figure is a figure that can be divided into two or more basic figures. The area of a composite figure can be found by dividing it into basic figures whose areas can be calculated easily. For some figures, the area can also be found by surrounding the figure with a basic figure, creating other basic figures " between " the original figure and the surrounding figure.

[Math-Grade 6-Surface Area and Volume-Basic & Composite:::](#)

Students work on breaking the composite shapes into shapes they can use to find area. Most students will break this shape into 2 right triangles and a rectangle. Some students may create triangles that are not right triangles and a rectangle.
