This is a book about using R to create data mashups. Now this is not an idea that will occur immediately to most programmers. R is indeed a statistical language and it does

Read Book Data Mashups In R

handle both large datasets and it produces graphics. However, most programmers will think of using some other more commonly encountered languages to create an entire system.

Data Mashups in R - I Programmer

A data mashup is an integration of two or more data sets in a single graphical interface. A business dashboard is a prime example of a data mashup hard at work – most dashboards pull data from multiple, disparate sources to provide end-users with an at-a-glance view of their business performance.
