Epidemiologic  
Study Designs

# Read Free Epidemiology

- Descriptive studies - Seeks to measure the frequency of disease and/or collect descriptive data on risk factors
- Analytic studies - Tests a causal hypothesis about the etiology of disease

# Read Free Epidemiology

- Experimental studies
  - Compares, for example, treatments

## **Epidemiologic Study Designs**

In this article,  
I present a  
simple  
classification  
scheme for  
epidemiological

Read Free  
Epidemiology  
Study Design, a  
topic about  
And Data  
Analysis  
which there has  
been  
considerable  
debate over  
several decades.  
I will argue  
that when the  
individual is  
the unit of  
analysis and the  
disease outcome  
under study is

# Read Free Epidemiology

dichotomous,  
then  
epidemiological  
study designs  
can best be  
classified  
according to two  
criteria: (i)  
the type of  
outcome under  
study (incidence  
or prevalence)  
and (ii) whether  
there is

Epidemiology -  
Epidemiology -  
Sources of  
epidemiological  
data:

# Read Free Epidemiology

Epidemiologists use primary and secondary data sources to calculate rates and conduct studies. Primary data is the original data collected for a specific purpose by or for an investigator.

For example, an

# Read Free Epidemiology

epidemiologist  
may collect  
primary data by  
interviewing  
people who  
became ill after  
eating at a  
restaurant in  
order to  
identify which  
specific foods  
were consumed.
