Chapter 1 summarizes contemporary theories of emotion in general, and of musical emotion in particular, bringing together seminal philosophers and psychologists. Chapter 2 contains the core of the book's original thesis: that five basic emotions (happiness, sadness, anger, tenderness, and fear) constitute five categories of musical emotion throughout the common-practice period. Chapter 3 outlines a variety of complex musical emotions, such as wonder, nostalgia, envy, and disgust. Chapter 4 explores the historiography of emotion, including the seminal writings of Elias, Rosenwein, and Reddy. Part 2 of the book (chapters 5-9) explores a millennium of Western music in terms of shifting categories of emotion: from affections and passions through sentiments, emotions proper, to modern affect"--
