The L98 is a 6.0L, Gen. 4, small block aluminum engine used in GM's Australian Holden vehicles between 2006 and 2010.

The L98 is a slightly modified version of the L76. The main difference is the absence of

Download Free L98 Engine

displacement on demand (DoD) tech. Redundant AFM/DoD hardware was eliminated for the L98, and offered a slight power increase over the L76.
