Population and economic development in Hindi

~~Population And Economic Development~~

Population growth helps the process of development in certain ways and hampers it in certain other ways. This is so because the relation-

Read Book Population And Economic Development

ship between population growth and economic development is intricate, complex and interacting. On the positive side, an increasing population means an increase in the supply of labour— a basic factor of production. And growth of population and labour supply has all along been one major source of growth in recorded history.

~~Population Growth and~~

Greek philosophers, about 2,500 years ago, population growth was undesirable as it adversely affects economic development.

~~Population Growth and Economic Development: A Close View~~

In developing areas of the world, population growth can seem to have a positive effect on local economies. But is this growth always a good thing? Additional people provide a workforce necessary to generate goods and services. However, in some cities, rapid growth leads to skyrocketing housing prices and unmanageable traffic.

~~The Effects of Population Growth on Economic Development ...~~

The relationship between population growth and economic development can be measured by looking at the impact of population growth on economic development and vice-versa. The phases of Demographic Transition theory can be considered looking at three different time frames i.e. before the transition, during the transition and post-transition to better have an understanding of the population growth pattern.

Human development: measures the access the population has to wealth, jobs, education, nutrition, health, leisure and safety - as well as political and cultural freedom. Material elements, such as wealth and nutrition, are described as the standard of living. Health and leisure are often referred to as quality of life.

grew in the past 50 years, economic growth is less likely to be translated into an improvement in the average standard of living. But the rate of population growth is not a constant; it is affected by other economic forces.

~~Population Growth and Economic Development~~

The relationship between population growth and economic development has been a recurrent theme in economic analysis since at least 1798 when Thomas Malthus famously argued that population growth would depress living standards in the long run.

Population Growth and Economic Development of a Country! When population grows faster than GNP, the standard of living of the people does not improve. In fact rapid population growth has been obstructing economic growth in developing countries like India where since 1951 population has been growing at a relatively high rate.

~~Population Growth and Economic Development of a Country~~

Economic growth is measured
