The second set of difference between qualitative and quantitative research can be summed up as context, values, and involvement. In the quantitative camp, research is supposed to be

Conducted independent of
context, be free of societal
or cultural values, and the
researcher is detached from,
or not involved, in the
process.

Qualitative is usually more
subjective, although like

Research Design: Qualitative, Quantitative, and Mixed . . .

The academic field of
research methods describes
how different approaches to
research can yield insight
and results. Historically,

Download Free Research Design Qualitative

quantitative (i.e.,
numerical) approaches have
dominated. Recently,
qualitative (i.e.,
descriptive in words)
approaches have increased.
Also recently, mixed methods
approaches have combined the

two to tell interesting
stories more expeditiously.
