There is much controversy over the development of new dams for hydropower, where concerns for environmental protection and the livelihoods of local people may conflict with the goals of economic development. This book analyses the opportunities and barriers that NGOs

This book addresses important and under-researched issues such as, the role of young people in democratization processes, the role of new democracies in sharing their transition experience, and the effectiveness of aid. A major theme of

Advocacy organizations are viewed as actors motivated primarily by principled beliefs. This volume outlines a new agenda for the study of advocacy organizations, proposing a model of NGOs as collective actors

Access PDF Rules Norms And Ngo Advocacy

that seek to fulfil normative concerns and instrumental incentives, face collective action problems, and compete as well as collaborate with other advocacy actors. The analogy of the firm is a useful way of studying advocacy actors because individuals, via advocacy NGOs, make choices

Access PDF Rules Norms And Ngo Advocacy

which are analytically similar to those that shareholders make in the context of firms. The authors view advocacy NGOs as special types of firms that make strategic choices in policy markets which, along with creating public goods, support organizational survival, visibility, and growth.

Access PDF Rules Norms And Ngo Advocacy

Advocacy NGOs' strategy can therefore be understood as a response to opportunities to supply distinct advocacy products to well-defined constituencies, as well as a response to normative or principled concerns.

Transparency in the regulation of water utilities is essential in order to ensure quality and fairness. This book explores and compares different

Access PDF Rules Norms And Ngo Advocacy

regulatory arrangements in the water utilities sectors in three jurisdictions to determine which regulatory and ownership model is most transparent and why. The three jurisdictions considered are England (UK), Victoria (Australia) and Jakarta (Indonesia). Following an introduction to the

Access PDF Rules Norms And Ngo Advocacy

importance of transparency in water utilities regulation, the book provides an overview of the three chosen jurisdictions and their legal and institutional frameworks. Through a comparison of these the author explores the contested and difficult terrain of "privatization", as (often)

opposed to public ownership, in which it is shown that the relationships between transparency and ownership models are not as clear-cut as might be assumed. Chapters consider various aspects and outcomes of the regulatory process and the role of transparency, including topics such as

Scholarly interest in water ethics is increasing, motivated by the urgency of climate change, water scarcity, privatization and conflicts over water resources. Water ethics can provide both conceptual perspectives and

Water scarcity is not simply the result of what nature has to offer but always involves power relations and political decisions. This volume discusses the
