Cloud computing continues to emerge as a subject of substantial industrial and academic interest. Although the meaning and scope of "cloud computing" continues to be debated, the current notion of clouds blurs the distinctions between grid services,

Online Library Smpte 2032 1 2007

web services, and data centers, among other areas. Clouds also bring considerations of lowering the cost for relatively bursty applications to the fore. Cloud Computing: Principles, Systems and Applications is an essential reference/guide that provides thorough and timely examination of the

Online Library Smpte 2032 1 2007

services, interfaces and types of applications that can be executed on cloud-based systems. The book identifies and highlights state-of-the-art techniques and methods for designing cloud systems, presents mechanisms and schemes for linking clouds to economic activities, and offers

Online Library Smpte 2032 1 2007

balanced coverage of all related technologies that collectively contribute towards the realization of cloud computing. With an emphasis on the conceptual and systemic links between cloud computing and other distributed computing approaches, this text also addresses the practical

Online Library Smpte 2032 1 2007

importance of efficiency, scalability, robustness and security as the four cornerstones of quality of service. Topics and features: explores the relationship of cloud computing to other distributed computing paradigms, namely peer-to-peer, grids, high performance computing and web

As the Department of Defense (DoD)
develops and employs an increasingly
sophisticated force of unmanned

Online Library Smpte 2032 1 2007

systems over the next 25 years (2007 to 2032), technologists, acquisition officials, and operational planners require a clear, coordinated plan for the evolution and transition of unmanned systems technology. With the publication of this document, individual roadmaps and master plans

for UASs, UGVs, and UMSs (defined as Unmanned Undersea Vehicles (UUVs) and Unmanned Surface Vehicles (USVs)) have been incorporated into a comprehensive DoD Unmanned Systems Roadmap. This integrated Unmanned Systems Roadmap is the plan for future

prioritization and funding of these systems development and technology, thus ensuring an effective return on the Department's investment. Its overarching goal, in accordance with the Strategic Planning Guidance (SPG), is to guide military departments and defense agencies toward logically

and systematically migrating applicable mission capabilities to this new class of military tools. This Roadmap highlights the most urgent mission needs that are supported both technologically and operationally by various unmanned systems. These needs, listed below, should be

Online Library Smpte 2032 1 2007

considered when prioritizing future research, development, and procurement of unmanned systems technology to ensure an effective return on the Department's investment.
