IPC Users Guide. Inter-Processor Communication (IPC) provides a processor-agnostic API which can be used for communication between processors in a multi-processor environment (inter-core), communication to other threads on same processor (inter-process), and communication to peripherals (inter-device). The API supports message passing, streams, and linked lists.

~~IPC Users Guide — Texas Instruments Wiki~~

IPC is a component containing packages that are designed to allow communication between processors in a multi-processor environment and communication to peripherals. This communication includes message passing, streams, and linked lists. These work transparently in both uni-processor and multi-processor configurations.

~~SYS/BIOS Inter-Processor Communication (IPC) 1.25 (Rev. E)~~

The IPC product contains an examples/archive directory

The ti.sdo.ipc.Notify module manages the multiplexing/demultiplexing of software interrupts over hardware interrupts. In order to use any Notify APIs, you must first call Ipc_start(). This sets up all the necessary Notify drivers, shared memory, and interprocessor interrupts.

IPC provides an implementation of the IMessageQTransport interface called `ti.sdo.ipc.transports.TransportShm` (shared memory). You can write other implementations to meet your needs. When a transport is created via a transport-specific `create()` call, a remote processor ID (defined via the `MultiProc` module) is specified.

term of Inter-Processor Communication referred widely in the industry, but also a package in TI Processor SDK for multi-core communication. In generic usage, there are different ways for multi-core communication such as OpenCL, DCE, TI-IPC, and etc. In TI's IPC package, it uses a set of modules to facilitate the inter-processor communication.

IPC Overview. The IPC product provides software connectivity between multiple processors. Each processor may run either an HLOS (e.g. Linux, QNX) or an RTOS (e.g. SYS/BIOS). IPC is an open source project, currently managed with git, and maintained at <http://git.ti.com/ipc/ipcdev>. Full source browsing, including all changes, are available here .
