It is usually hard to associate early-stage companies with a form of value since it has been identified that roughly 70% of investors get it wrong. Nonetheless, there are still a variety of methods that aids an investor to find the enterprise value of the start-up (CCA such as EV/Revenue, EV/EBITDA, to even DCF of future cash flows).

Option Pricing Model(OPM) for Valuing Early Stage and ...

From an earlier question, we know that an early stage VC wants to figure that every \$1 dollar invested will get \$10 or more back if the investment is a winner. Which means you need to convince them that whatever they put in now, and factoring in future dilution and the 'exit' proceeds when you sell the company (and the larger majority of exits are by sales, not IPOs) will give them at ...
